PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Data Science student with hands-on experience in Python development, machine learning, data analytics, and full-stack application development. Skilled in building AI-powered applications using Python, React. Flask, and MongoDB. Experienced in developing machine learning models and data-driven solutions through internships and projects. Strong problem-solving and analytical skills with a commitment to continuous learning and software development.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science Aug 2023 – Aug 2027
AAA College of Engineering and Technology CGPA: 8.01

TECHNICAL SKILLS

Programming: Python, SQL, Java
Web Development: HTML, CSS, React.js, Flask, REST APIs
AI/ML: Machine Learning, Neural Networks, NLP, TensorFlow, Keras, Scikit-learn
Data Analysis: Pandas, NumPy, Data Preprocessing, EDA, Data Visualization
Databases and Tools: MySQL, MongoDB, GitHub, VS Code, Google Colab, Power BI

PROJECTS

Namma Schemes – AI-Powered Government Scheme Assistant

- Developed a multilingual web application for government scheme discovery and eligibility verification using an AI-based recommendation system.
- Integrated voice-based search supporting Tamil, English, and Hindi using NLP and speech recognition APIs.
- Technologies: React.js, TypeScript, Node.js, Express.js, Python, Flask, MongoDB.

MindMitra – AI-Powered Student Wellness Platform

- Developed a student wellness platform with AI-powered voice and text interactions for stress management and personalized support.
- Implemented multilingual interaction in English, Tamil, and Tanglish.

Technologies: React.js, Flask, Python, MongoDB, AI APIs

Breast Cancer Prediction – Machine Learning

- Built a neural network classifier achieving over 90% accuracy on the evaluated clinical dataset.
- Applied data preprocessing, feature engineering, and model evaluation.

Technologies: Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy

CampusPay – Smart Campus Payment System

- Designed a QR-based campus payment system with canteen management, inventory tracking, and parent monitoring.
- Incorporated machine learning-based food demand prediction and inventory forecasting.

Technologies: React.js, Flask, Python, MongoDB, Machine Learning

INTERNSHIP EXPERIENCE

Software Development Intern (Python) – Reccsar Pvt. Ltd. Jan 2026 – Jun 2026

- Applied Python programming and problem-solving to software development assignments.
- Developed and evaluated machine learning models using data preprocessing, training, and Scikit-learn.

Data Analytics Intern – Assure eServices Dec 2025 – Jan 2026

- Performed exploratory data analysis, data cleaning, and transformation to identify trends in datasets.
- Used Python, Excel, and Power BI for data visualization and reporting.

Machine Learning Intern – Jyesta Corporate Entity Feb 2026 – Apr 2026

- Applied machine learning concepts to data preprocessing, model training, and model evaluation.
- Used Python and machine learning libraries to develop and evaluate predictive models.

CERTIFICATIONS

Web Development Using Python – iTECH Academy (2025)
Machine Learning – Jyesta Corporate Entity (2026)
Data Fundamentals – IBM SkillsBuild (2025)
C Programming Language – UNIPRO Training Institute (May 2024)

ACHIEVEMENTS

- **Future 6.0 Innovation Challenge:** Won the Young Indians (Yi) Sivakasi Chapter Final and was selected for the National Level Round.
- **Won First Prize – Ideathon '26:** At PSR Engineering College, Sivakasi, for developing Namma Schemes, an AI-powered government scheme assistant.
- **Outstanding Performer Award:** Received recognition at the Rotary Youth Leadership Awards (RYLA), Rotary Club, for leadership and communication skills.
- **Student Excellence Award:** Recognized by STEP Society for academic performance, leadership, and overall excellence.
- **Future Leaders Scholarship (2026):** Awarded for academic merit and leadership potential.
